1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Fordenbacher on March 19, 2004.

The application has been amended as follows:

Claims 4 and 10 have been canceled (Note: claims 1-3 have been previously canceled in the amendment after final filed on February 9, 2004).

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the reference number -- 8 -- (the rear wall of the hoist way) has been labeled. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

3. The following is an examiner's statement of reasons for allowance:

The examiner indicated in the final office action (mailed on October 9, 2003) that claims 5 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Applicant has complied with the examiner suggestion and has rewritten claims 5 and 11 in independent form including the limitations of the base claims in the provided amendment after final.

Art Unit: 3652

Gregory (536,927) in view of SOMFY's Catalog, provided by the applicant, does not show or suggest *the upper sheaves are rotatably coupled to a sheave mount wherein the sheave mount pivotally mounted at the top of the tower assembly to thereby respond to a change in a length of either cable by pivoting to retain a balanced load on each cable* in combination with other structural limitations. It would not be obvious to add another third reference on the modified Gregory's device (536,927) to modify the sheave mount being *pivotally mounted at the top of the tower assembly to thereby respond to a change in a length of either cable by pivoting to retain a balanced load on each cable* since none of the cited references or prior art teaches or suggest the above limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL T. CHIN whose telephone number is (703) 305-1524. The examiner can normally be reached on MON-THURS (7:30 -6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, EILEEN LILLIS can be reached on (703) 308-3248. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
